EXPERIENCE

Principal Staff Software Engineer — Retailetics SDN BHD

Kuala Lumpur, Malaysia · February 2021 – Present

Retailetics AI-infused Self-Checkout Smart Trolley (ezyCart). Spearheaded an AI-powered self-checkout shopping cart: architecture, stakeholder design, and UX. Built a real-time socket pipeline between IoT devices and the ezyCart Android app for fast sync without slow transfers or redundant permission requests.

Delivered million-dollar savings with an AI-powered indoor navigation system. Saved over $2M by eliminating thousands of Bluetooth beacon devices.

Conceptualized, designed, and developed a cross-platform support staff app (Flutter) and an Android TV cart monitor system.

Conceptualized and developed Lisa — an AI shopping assistant that resolves customer queries and provides real-time product recommendations and promotions.

Developed and deployed machine learning models for the in-store product line.

Automated build pipeline and deployment for merchants and outlets, reducing deployment time across retail sites.

Led split testing initiatives driving multi-million-dollar revenue growth and stronger in-store customer experiences.

TAN INTELLIGENCE

Custom trading indicators

End-to-End Quantitative Systems: Engineered and deployed proprietary algorithmic trading models and custom indicators across Commodities, FX, and Crypto, operating systematically for over 6 years.

Automated Architecture & Telegram Pipelines: Built custom 5-minute and 15-minute signal engine pipelines integrated with Telegram alerts and low-latency automated execution AI-bots via REST and WebSockets.

Strategy & Market Structure: Developed rule-based frameworks applying Smart Money Concepts (SMC), liquidity sweeps, and dynamic position-sizing protocols to optimize risk-adjusted returns.

Execution & Backtesting Rigor: Automated multi-broker execution (TradingView, MetaTrader) using Python and Pine Script; backtested and forward-tested strategies to maintain a sub-5% maximum drawdown limit.

Top Skills: Quantitative Finance · Algorithmic Trading · Python · Pine Script · Automated Execution · API Integration (WebSockets/REST) · Risk Management

SKILLS

Mobile: Java, Kotlin, Dart, Android SDK, Jetpack Compose, Flutter, Kotlin Multiplatform, iOS

Backend: REST, GraphQL, WebSockets, Spring Boot, Postgres, SQLite, microservices

AI/ML: TensorFlow, PyTorch, Keras, OpenCV, on-device ML, NLP, model quantization

Delivery: Jenkins, Fastlane, Docker, Git, CI/CD, split testing, SOLID, Clean Architecture, MVVM

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

Anna University Chennai

CERTIFICATIONS

Mobile iOS & Android development — Target Software, Chennai

SOLID Principles — Coursera

AI/ML Architecture — IBM

Master prompting — Claude and Coursera
