Vijay Baskaran Arjun Dev

Head of Software Technologies @ Retailetics | AI/ML Developer | Mobile Systems & Scaled Engineering

Federal Territory of Kuala Lumpur, Malaysia · GitHub: github.com (profile URL not listed on source resume)

EXPERIENCE

Head of Software Technologies — Retailetics

Federal Territory of Kuala Lumpur, Malaysia · Present

Lead software for AI-infused in-store retail: scan-pay-go carts, kiosks, cart security, and aisle wayfinding.

- Own the software surface for Retailetics' in-store stack: AI-infused smart trolleys, weight-sensor self-checkout kiosks, automatic antitheft cart locking, and indoor product navigation.
- Lead mobile systems and scaled services so scan, weigh, pay, and wayfinding stay in lockstep across carts, kiosks, and store operations.
- Apply computer vision, on-device inference, and cloud models so product validation, promotions, and hyperlocal insights land while the shopper is still in the aisle.
- Set engineering standards across client, backend, and ML so retailers can roll out scan-pay-go without ripping out existing POS.

INDEPENDENT VENTURE

Founder — TAN Intelligence

AI-powered forex trading indicator

TAN Intelligence is an independent company building an original Artificial Intelligence trading indicator for the forex market. The longer system direction is indicator, then signals, then an automated bot with explicit risk controls. This is founder work, not a second employer.

SKILLS

Mobile systems: iOS, Android, Swift, Kotlin, Java, mobile architecture, sensor-connected clients

Backend & scale: REST APIs, distributed services, cloud, SQL, caching, CI/CD, observability

AI / ML: computer vision, on-device inference, model architecture, master prompting, retail analytics

In-store systems: scan-pay-go, POS integration, IoT & beacons, weight sensors, in-aisle payments

Engineering craft: SOLID, Git, Agile, system design, technical leadership

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

Anna University Chennai

CERTIFICATIONS

Mobile iOS & Android development — Target Software, Chennai

SOLID Principles — Coursera

AI/ML Architecture — IBM

Master prompting — Claude and Coursera
